DETAILED ACTION

Specification

The application has not been checked to the extent necessary to determine the presence of all possible typographical and grammatical errors. Applicant's cooperation is requested in correcting any errors of which he/she may become aware in the application.

The Information Disclosure Statements filed 01/21/2005 have been considered.

Objection To Claims

Claim 15 is objected to because of the following informalities: Claim 15 recites steps c1 and c2 which have already been recited in claim 14. C1 and C2 should be replaced by a different label to avoid confusion.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-20 in view of **MPEP section 2106 IV.B.2. (b)** define non-statutory processes because they merely manipulate an abstract idea without a claimed limitation to a practical application. The language of the claims raise a question as to whether the claims are directed merely to an abstract idea that is not tied to a technological art, environment or machine which would result in a practical

application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C. 101. A program not claimed **as being executed by a computer** is descriptive material per se and is not statutory process. Applicant is advised to amend the claims by specifying the claims being directed to a practical application and producing a tangible result **being executed by a computer**. As such, claims 1-21 would be considered non-statutory under 35 U.S.C. 101.

Claims 2-19 are necessarily rejected under 35 U.S.C 101as being dependent upon rejected claim 1.
